

# P-TES

## Personal Tactical Extraction System

### Features

- Rapid and easy to use in any emergency situations. P-TES enables extraction within two minutes or less, which is essential for survival when hemorrhage occurs.
- Reduced risk for rescue personnel. P-TES shortens time at the casualty site, enables both hands to handle firearms and maximizes situational awareness.
- MOLLE and Tactical belt compatible. P-TES is attachable anywhere on personal gear.
- Designed for military/police/law enforcement and rescue personnel. P-TES enables extraction of anybody, including civilians.
- If required, the P-TES can be extended to 4.8 meters/15.7 feet or longer, by connecting two or more P-TES.
- Small, light (approx. 160 grams/5.65 ounces) and strong (500 kg/1100 pounds).
- The P-TES is compatible with any stretcher for a faster and safer casualty evacuation.
- The P-TES also enables the user to lift heavy objects and to move obstacle.
